

■ Tree Soul Genesis (TSG)

Official Whitepaper v1.0 (2025)

Page 1 – Abstract & Vision

Abstract

Tree Soul Genesis (TSG) is a sustainable crypto project designed to connect blockchain innovation with environmental regeneration. By combining green blockchain technology, NFT initiatives, and digital energy ecosystems, TSG aims to create a future where every transaction contributes to global sustainability. Our mission is to transform the crypto world into a force for environmental good — one block, one token, one tree at a time.

Vision

“Green blockchain solutions empowering people to shape an eco-friendly digital future.” Tree Soul Genesis envisions a world where technology and nature coexist harmoniously — where users can participate in eco-driven crypto, NFT planting programs, and digital energy networks that reward sustainability.

Page 2 – Technology & Blockchain

Blockchain

Built on the Polygon network, TSG offers scalability, speed, and minimal energy consumption — a true green chain. Polygon’s low gas fees and eco-efficient consensus make it the ideal base for TSG’s environmental mission.

Smart Contracts

All TSG smart contracts are secure, modular, and transparent, developed with industry-standard security protocols. An external audit process ensures system integrity and long-term stability.

Ecosystem Features

- NFT Minting: Limited Tree NFTs representing carbon offset initiatives.
- Staking System: Earn rewards for holding TSG tokens and supporting sustainability pools.
- Governance DAO: Token holders vote on environmental projects and ecosystem updates.

Security & Transparency

Regular contract audits.
Open-source code available on GitHub.
Decentralized community governance.

Page 3 – Tokenomics

Allocation	Percentage	Purpose
■ Liquidity Pool	40%	Initial DEX liquidity & market stability
■ Community & Airdrop	25%	Rewards for early supporters & eco-participation
■ Development & Partnerships	15%	Platform expansion & environmental collaborations
■ Team & Advisors	10%	Long-term growth incentives
■ Reserve & Sustainability Fund	10%	Real-world green projects & reforestation funding

Total Supply: 100,000,000 TSG
Blockchain: Polygon (MATIC)

Page 4 – Roadmap

Timeline	Milestone
Q1 2025	Project conceptualization & whitepaper draft
Q2 2025	Smart contract development & third-party audit
Q3 2025	Token launch & first NFT Tree Collection
Q4 2025	Launch staking platform & governance voting
2026+	Ecosystem expansion, strategic partnerships, and sustainability programs

Page 5 – Team & Contact

Founder / Core Team

A collaborative group of blockchain developers, crypto innovators, and environmental advocates passionate about merging technology and nature.

Advisors

Experts in sustainable development, DeFi strategy, and blockchain community building.
